## MYOSTEM MASS

### Muscle development and weight building

Feed supplement to stimulate muscle development and weight building.

**Properties:**

- Very concentrated in essential amino acids.
- Optimal assimilation: enriched with BIO-MOS® and Fenugreek.

The concentrated intake in essential amino acids has been set according to the ideal protein profile of the horse's muscle. This formula helps increase protein synthesis and develop muscle mass.

Fenugreek stimulates the appetite while BIO-MOS® is a prebiotic that contributes to optimising assimilation of the ration.

Total intake in essential amino acids / 100 g					
Lysine	5,3 g	Arginine	4,5 g	Methionine	1,4 g
Phenylalanine	4,1 g	Histidine	2,3 g	Valine	4 g
Leucine	6,8 g	Isoleucine	3,5 g	Threonine	3,8 g

**Indications:**

- Training
- Convalescence / Old age
- Young horses during growth
- Weight building

**Directions for use:**

Administer for a minimum of 3 weeks.

- Adult horses: 100 g per day. (1 measuring scoop = 40g)
- Young horses: 50 g per day.

For best results, administer following exercise while ensuring adequate carbohydrate intake (grains).

**Nutrigenomics** have demonstrated that certain nutrients are able to affect gene expression. This new scientific discipline renders Audevard products even more efficient, safe and horse-friendly.
